WE LOVE WHAT YOU LOVE: DOLPHINS THAT IS WHY WE WANT TO SHARE THIS WITH YOU

1 Our interactive programs educate thousands of guests focusing on respecting and caring for the environment.

2 More than 60% of our Dolphins were born in human care in our habitats through our Miracle Reproduction Program.

3 When in human care, Dolphins' average lifespan can be double those in the wild.

4 Dolphins' diets are calculated based upon weight and age.

5 Each Dolphin Habitat has a resident Veterinarian.

6 Each Dolphin has a Marine Mammal Specialist to supervise its care.

7 Our habitats exceed the dimensions that the norm requires.

8 At Dolphin Discovery, we use the positive reinforcement technique to communicate with our Dolphins and to create bonds of trust and love. We reward them with caresses, food or games, always with respect.

9 Being born in human care, Dolphins depend on humans to survive.

10 More than 500,000 Marine Mammals die every year in a hostile environment due to fishing and pollution.

11 Thanks to the knowledge acquired through Dolphins in human care, we are able to contribute to the rescue, rehabilitation and reintroduction of wildlife.

Get informed,

become a steward of the oceans and contribute to the conservation of Dolphins and their environment.
